

— SOFTWARE FOR CARE HOMES AND RESIDENTIAL CENTRES

Your care home compliant. Your rota, solved.

VeltoCare plans your team's shifts, records working time with GPS or QR and keeps a tamper-proof history that is ready for the labour inspectorate. No spreadsheets and no surprises.

✓ RD-ley 8/2019

✓ Tamper-proof record

✓ Private instance

✓ Price per centre

What happens when the rota lives in a spreadsheet

No care home runs badly for lack of effort. It runs badly because the information is split between a spreadsheet, a WhatsApp group and the coordinator's memory.

Three versions of the same rota

The spreadsheet goes back and forth on WhatsApp. Nobody knows which one is current, and Saturday's shift ends up with two people on it... or none.

Sign-in sheets that prove nothing

Filled in all at once on Friday. No real times, no traceability and no value at all if anyone challenges them.

Six in the morning and someone calls in sick

Blind phone calls until somebody can come in, with no idea who is off, who is piling up hours or whose turn it is.

Overtime that shows up in the payroll

Without a reliable count the mismatch is found late: once it has been paid, or once the employee claims it.

Holidays that overlap

Two care assistants from the same section, the same week in August. You find out once both are already approved.

And if the inspector calls tomorrow

Rebuilding twelve months of working time by hand, from loose paper and e-mails, while the inspector waits.

All of this is the same problem. Shifts, clocking, absences and hours are four faces of the same data. Once they live in the same place they stop contradicting each other, and the end of the month stops being a reconstruction.

Recording working time stopped being optional in 2019

Royal Decree-Law 8/2019 amended article 34.9 of the Spanish Workers' Statute: every company must record each worker's daily working time, with start and end times, and keep those records for four years.

34.9 ART. WS

Daily working-time records are compulsory for every company

4 YEARS

Records must be kept available to the labour inspectorate

7,500 €

Maximum penalty for a serious time-recording infringement

The fine is the least of it. Without a valid record, a company facing an overtime claim has lost its main defence. The real cost is rarely the penalty: it is what gets conceded afterwards.

How VeltoCare solves it

- ✓ Every mark carries server time, IP, device and location
- ✓ A verifiable hash chain: nothing is deleted, everything stays linked
- ✓ Corrections require a reason and are signed with author and date
- ✓ Inspection portal and API with its own key for the inspectorate
- ✓ Records kept for more than four years
- ✓ Full export to CSV and PDF at any time

WHAT THE RULE DEMANDS, POINT BY POINT

Daily record

For every worker and every day, whatever their contract type.

Start and end

Actual entry and exit times, not a monthly total of hours.

Four years

Records are kept and remain consultable throughout that period.

Available

To the staff, to their legal representatives and to the labour inspectorate.

Everything a centre runs on, in one place

Planning, clocking and compliance stop being three separate processes you have to reconcile by hand every month.

Shift planning

Monthly, weekly, fortnightly and spreadsheet views. Reusable M/T/N/C shift patterns, bulk assignment, cover, swaps and full-year copy.

QR presence screen

A tablet at reception showing a code that refreshes every 60 seconds. Staff scan it or type 6 digits. No session left open on the tablet.

Fully stamped clocking

Clock in, clock out and breaks with server time, IP, device, GPS or QR. PIN kiosk with 5 digits and offline mode that syncs later.

Live coverage

Spots gaps by section and day before they happen. You know instantly who is missing and where you need cover.

Holidays and absences

Annual entitlement with a live balance, ten absence types, time off and leave. Automatic overlap checks by section.

Hours and overtime

Contracted hours against clocked hours, person by person. Automatic alert as anyone approaches the legal limit of 80 overtime hours a year.

Tamper-proof history

Every change is chained with a verifiable hash. Nothing is deleted: corrections are recorded with a reason and an author.

Inspection portal and API

The inspector uses their own key to reach the records and the integrity check, without entering your admin panel.

INCLUDED IN BOTH PACKAGES AT NO EXTRA COST

Offline mode

The kiosk keeps recording without a connection and syncs when it returns.

Automatic backups

Your instance is backed up daily, without you having to remember.

Private instance

Your own subdomain and database, with no centres mixed together.

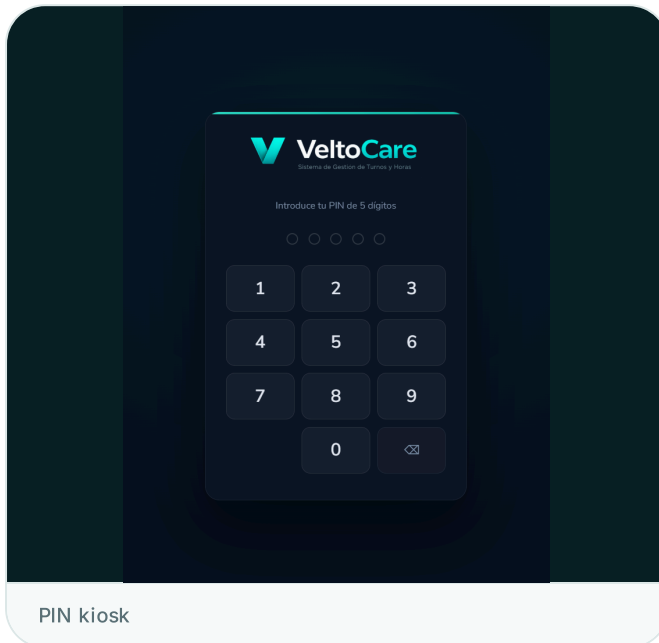

Direct support

You talk to the person who builds it, not to a first-line agent.

Clock in within seconds, prove it without argument

A PIN kiosk on the centre's tablet, a personal panel on the phone and a QR presence screen at reception. Every mark is stamped with server time, IP, device and location.

- ✓ 5-digit PIN: staff clock in on the shared tablet, with no accounts or passwords
- ✓ A presence QR that refreshes every 60 seconds: a photo of the code is useless a minute later
- ✓ GPS geofence: checks the mark was made inside the centre's radius
- ✓ Statutory breaks: rest time is recorded and deducted from the net count

It works without a connection. The kiosk stores marks locally and syncs them as soon as the network is back.

The month's rota, built in an afternoon

Monthly, weekly, fortnightly and spreadsheet views over the same data. Reusable M/T/N/C shift patterns, bulk assignment and a full-year copy.

veltoCare · Shift calendar

- ✓ Coverage by section and day: spots the gaps before they happen
- ✓ Cover and swaps, with a history of who covered for whom
- ✓ Holidays and absences with automatic overlap checks
- ✓ Hour tracking: contracted against clocked hours, with the legal overtime alert

veltoCare · Holidays and absences

Absences get planned, not discovered

Annual holiday entitlement with a live balance, ten absence types, discretionary days and leave. When two people from the same section ask for the same week, the system warns you before the request is approved—not in August, with the shift already uncovered.

Every approval shows up in the rota immediately, so the month's coverage always reflects who will actually be available.

If the inspector calls tomorrow, it is already done

Every change in the system is chained with a verifiable hash. The inspector uses their own key to reach the records and the integrity check, without entering your panel.

veltocare · Change history

Nothing is deleted

Corrections are recorded with reason, author and date inside the same chain.

Verifiable integrity

One button checks the whole hash chain and flags any record that does not add up.

Inspection portal

Separate access for the inspectorate, with an API and CSV or PDF export.

The evidential value is in the traceability. A record that can be edited without leaving a trace proves nothing. Here every correction is signed and chained, the data is kept for more than four years, and you can hand over the full history as CSV or PDF the same day it is asked for.

Everyone sees exactly what is theirs

Administrator

Full control of the centre: staff, shifts, users, settings, hour reconciliation and the complete audit trail.

Full access

User management

Audit trail

Supervisor

Plans and supervises the daily operation —shifts, coverage and clocking— without touching critical settings.

Shifts and clocking

Approvals

No critical settings

Employee

Clocks in with a PIN or the centre's QR code and checks their own rota, hour balance and requests from their phone.

PIN · QR · GPS

Their rota

Requests

From the first call to clocking in: three steps

1

Demo over video call WHENEVER SUITS YOU

I show you VeltoCare running on realistic sample data: shifts, clocking, holidays and compliance. No sales deck and no commitment.

2

Setup and training A MATTER OF DAYS

I configure your private instance, load your staff list, define sections and shifts and train your team. You prepare nothing technical.

3

Live ONGOING SUPPORT

Your centre plans and clocks from day one, with support straight from the developer —no tickets, no call centre, no support tiers.

Two packages. Fixed price per centre.

No per-worker cost. Your team grows and your fee stays put. Start with legal clocking alone, or run the whole centre.

CLOCKING ONLY

Legal time-clocking record

For centres that only need to clock hours and stay within the law.

150 € /month + VAT

Setup from **1,000 €** + VAT

- ✓ PIN kiosk · clock in, clock out and breaks
- ✓ GPS clocking with a geofence around the centre
- ✓ Presence tablet with a rotating QR code, no login
- ✓ Tamper-proof record + portal and API for the labour inspectorate
- ✓ CSV and PDF exports
- ✓ Private instance, automatic backups and support

Does not include shift planning, holidays, contracts or overtime tracking.

COMPLETE

MOST CHOSEN

Full workforce management

Everything your centre runs on, in a single platform.

240 € /month + VAT

Setup from **2,500 €** + VAT

- ✓ Everything in Clocking only
- ✓ Shift planning: month, week, fortnight and spreadsheet view
- ✓ Coverage by section, cover for absences and shift swaps
- ✓ Holidays, absences, time off and requests with approval
- ✓ Hour tracking and the legal overtime alert (Art. 35.2 ET)
- ✓ PDF contracts, annual summary and alerts dashboard

Founder Programme · 4 places left. The Complete package at 230 € a month frozen for life, with setup at 1,700 € instead of 2,500 €. Details on the next page.

Setup can be paid in one instalment with a 10 % discount, or in two. The initial contract runs for 12 months; cancelling early does not cancel the remaining fees of the contracted period. After the initial term it renews, or can be cancelled with 30 days' notice. Prices exclude VAT.

What each package includes

FEATURE	CLOCKING ONLY	COMPLETE
PLATFORM AND SECURITY		
Private instance with its own subdomain	✓	✓
Automatic backups	✓	✓
Access roles, training and user guide	✓	✓
Support straight from the developer	✓	✓
CLOCKING AND TIME CONTROL		
PIN kiosk · clock in, clock out and breaks	✓	✓
GPS within the centre's radius · IP and device	✓	✓
QR clocking (presence tablet + scanner)	✓	✓
Offline clocking with later sync	✓	✓
Automatic close and "did not clock in" alert	✓	✓
Edit or void with a reason, never deleted	✓	✓
COMPLIANCE AND AUDIT		
Tamper-proof record with hash chain	✓	✓
Inspection portal and API for the labour inspectorate	✓	✓
Records kept for 4 years	✓	✓
CSV and PDF exports	✓	✓
SHIFT PLANNING		
Month / week / fortnight / spreadsheet calendar	—	✓
M/T/N/C patterns and bulk assignment	—	✓
Full-year copy	—	✓
Coverage by section with suggestions	—	✓
Cover for absences and shift swaps	—	✓
HOURS AND HR		
Overtime count and legal alert (Art. 35.2 ET)	—	✓
Countable hours and deviations	—	✓
Holidays, time off and 10 absence types	—	✓
Requests, approvals and notifications	—	✓
PDF contracts and annual summary	—	✓

Both packages include a private instance with its own subdomain, automatic backups, training for your team and support straight from the developer.

Five founding care homes. 4 places left.

VeltoCare is in its first year. I am looking for five centres to adopt it now and help me sharpen it with real use. In return, they keep terms I will not be able to repeat later.

✓ 2 3 4 5 1 place taken · 4 available

✦ What you get

- ✓ A fee of 230 € a month, frozen for life
- ✓ Setup at 1,700 € instead of 2,500 €
- ✓ A direct line to me, with no switchboard and no tickets
- ✓ Real weight on the product roadmap

👤 What I ask for

- ✓ A testimonial, once you are happy
- ✓ Permission to name your centre as a reference
- ✓ Honest, frequent feedback

That is all. None of the three costs you money.

MONTHLY FEE

230 € /month + VAT

FROZEN FOR LIFE

SETUP

1,700 € ~~2,500 €~~

ONE-OFF PAYMENT · YOU SAVE 800 €

Why I am doing this

A management product is not finished in an office. It is finished when a coordinator tries to cover a shift at six in the morning and something is not where it should be. I would rather find that out with five centres who tell me straight, and pay them back for the time they give me, than go to market on assumptions.

AGAINST THE STANDARD RATE

800 € less on setup and **10 € less a month**, for good. Once the five places are taken the programme closes and the rate goes back to standard.

What centres ask before deciding

How long does setup take?

Days, not weeks. I configure your private instance, load your staff list, define sections and shifts and train your team. Most centres start clocking within the first week.

Do I need to buy any hardware?

No. VeltoCare runs in any browser: the admin computer you already have, a tablet at reception for the kiosk or the presence QR, and each employee's phone. There is nothing to install.

What if an employee has no phone, or isn't comfortable with one?

They don't need one. The kiosk works with a 5-digit PIN on the centre's tablet, and the QR presence screen never asks the worker to log in anywhere. The phone is an option, not a requirement.

Where is my data and who can see it?

Each centre gets its own instance with its own subdomain and its own separate database: your data is never mixed with another client's. Access is encrypted over HTTPS, backups run automatically, and every user sees only what their role allows.

Will it really hold up in a labour inspection?

That is exactly what it is built for. The working-time record is tamper-proof and chained with verifiable hashes, it is kept for more than four years, and there is a dedicated portal with an API for the inspectorate: the inspector logs in with their own key and reads the records without touching your admin panel.

What happens if someone clocks in wrong and it needs correcting?

It gets corrected, never deleted. Every edit or annulment requires a reason and is recorded with its author and date inside the same integrity chain. That traceability is precisely what gives the record evidential value.

Is there a minimum term?

The initial contract runs for 12 months. After that it renews automatically and you can cancel with 30 days' notice. The fee is fixed: it does not go up because you hire more people.

How many employees can I manage?

As many as you need. The price is per centre, not per worker, so your team can grow without the fee moving.

Let's see whether it fits your centre

Tell me how you handle shifts and clocking today and I'll show you, in a half-hour video call, how it would look in VeltoCare. If it doesn't fit, I'll say so.

DIRECT CALL

607 027 697

I answer myself. No switchboard, no forms and no ticket system.

WEB

veltocare.com

Product screenshots, prices and a demo. Also on WhatsApp at the same number.

WHO IS BEHIND IT

Guillermo Pérez Piquer

Developer and founder of VeltoCare

VeltoCare is not the product of a multinational with a call centre behind it. I build and maintain it myself, talking directly to the centres that use it. That is why I can move the roadmap when a care home needs something specific, and why support comes from the person who wrote the code.

4 Founder Programme places left

The Complete package at 230 € a month frozen for life, with setup at 1,700 € instead of 2,500 €. Once all five are taken, the programme closes.

YOU NEED TO PREPARE NOTHING FOR THE DEMO

No real data

I show it on a sample centre that is already loaded. You don't need to send me anything about your staff.

Nothing to install

It runs in the browser, from your computer. Half an hour, with whoever you want present.

No commitment

If by the end you can see it doesn't fit your centre, I'll say so myself and I won't push.

VeltoCare

Shift planning, time clocking and legal compliance for care homes

Brochure v1.0 · 2026
Alicante, Spain
